

Nexus MIDI for Kraftor

This firmware allows [Kraftor](#) to drive [Nexus_vox](#) from MIDI, either from MIDI USB or via the MIDI TRS input.

This firmware unlocks powerful control over Nexus Vox, allowing you to generate, tweak, and record text-to-speech as MIDI sequences. Perfect for live performance and studio production, it enables full customization of speech through phonetic, alphabet, and other modes, with real-time adjustments to speed, pitch, and prosody.

Date	Revision	Changes
2024-09-27	1.0	Added : Record text-to-speech in MIDI (via serial)
2024-05-09	0.1	initial release
