

# Robovox MIDI USB

Robovox MIDI USB firmware :

- Switch Terminal off
- Use the computer to save the file exactly as **"firmware.bin"** on the micro SD card
- Eject the card
- Place it into the Terminal near the display
- Power the Terminal

You should now see the "Robovox" device on your computer.

(note on version 0.6b it will show up as "Adafruit Feather M0")
