Pico vox

Teletype

A compact MIDI controller for Kraftor and other MIDI instruments. Five hinged keys, four assignable knobs and four banks put 20 note triggers and hands-on voice control at your fingertips. USB MIDI, 3.5 mm TRS MIDI Type B output and browser-based configuration.

Talko 2 Eurorack

Talko2 is the new generation of my very first speech synthesizer, Talko.

After Talko, I developed Emy, which added an OLED display and SD card reader.

Over 10 years of feedback, thousands of LPC files, and experience emulating other chips than the classic TMS5220 have now led me back to Talko2.

A powerful RP2040 enables the application of real-time effects.

Price does not include EU VAT

Talko 2 Terminal

Talko2 is the new generation of my very first speech synthesizer, Talko.

After Talko, I developed Emy, which added an OLED display and SD card reader.

Over 10 years of feedback, thousands of LPC files, and experience emulating other chips than the classic TMS5220 have now led me back to Talko2.

A powerful RP2040 enables the application of real-time effects.

 ***Price does not include EU VAT***

Kraftor Speaker

Small speaker, ideal for Kraftor.

3D printed case
Drop me a message to choose your favorite colors

(available: Blue, Back, Beige, Green, Red, White)

USB Y splitter

Y-shaped USB cable designed for Kraftor:

One USB-C connector provides external power, the USB-B plug connects your USB keyboard, and the second USB-C plug connects to Kraftor.

This setup enables Kraftor to act as a USB host for the keyboard, powered from a separate source, ensuring stable operation.

---

6 way jack connector

Passive 6-Way Signal Distributor for **Mono signals**

Usb to jack 2.1 power cable

0.5m power cable to power the Bricky modules from a USB bank or a power supply

---

Talko 2 Bricky

Talko2 is the new generation of my very first speech synthesizer, Talko.

After Talko, I developed Emy, which added an OLED display and SD card reader.

Over 10 years of feedback, thousands of LPC files, and experience emulating other chips than the classic TMS5220 have now led me back to Talko2.

A powerful RP2040 enables the application of real-time effects.

Kraftor Performer

Designed with you. Built around Kraftor.

Kraftor Performer is a family of custom speech instruments and MIDI controllers developed with each customer for performance, installations and experimental sound. The voice engine, controls, display, connections and enclosure are chosen for your project.

Choose an integrated instrument or a separate controller connected to Kraftor through **3.5 mm TRS MIDI Type B**. The photographs show example builds; your instrument can take a different form.

Built to order. Price on request.
Pricing and lead time are agreed once the design and scope are defined.

Discuss your instrument

Kraftor

Unleash the power of hardware speech synthesis with Kraftor – your computer's dedicated MIDI-to-voice interface.

Compact, powerful, and designed to directly **drive real hardware speech chips**, Kraftor hosts the entire Polaxis voice board catalog and puts physical voices under MIDI control.

As a **MIDI-controlled device**, Kraftor lets you trigger phonemes, words, and vocal expressions straight from your DAW, sequencer, or MIDI controller – no software emulation, just genuine hardware speech.

No Eurorack is required: connect Kraftor to your computer, send MIDI notes or sequences, and bring classic and experimental speech chips to life.

NEW : 32 KB on-board FRAM (high-speed, permanent memory)
