# SpeakJet vox

SpeakJet uses allophones that can be chained to produce words, but it continuously calculates how to **best transition** them for a realistic speech.

Four special prosodic codes (\SLOW \FAST \STRESS \SOFT) allow the user to fine-tune the expression of the next allophone :

alphabet: \AY \LO \FAST \FF \FAST \AX \STRESS \SOFT \BE \EY \SLOW \TT

Further tuning with the Rate, Pitch, Bend, and Volume parameters adds to the quality of the speech. These parameters are fully accessible via CV control. SpeakJet can also produce 43 sound effects, and 12 DTMF Touch Tones to create authentic glitches and beep sequences.

---

# Sino Vox

It generates speech from Chinese Pinyin or plain English (with a charming accent).

Users can set the speed, pitch, and volume of one of the five different unique voices.

It is straightforward to operate, and the voices have great potentials.

# Terminal patch

Decorate your Terminal gig bag with this cute little patch.

*Price does not include EU VAT*

---

# Robovox

## Have your Emy or Terminal sing like the Kraftwerk singing typewriter.

This board is designed to host the Votrax SC02 on Kraftor, Emy or Emy Terminal, where the main firmware is running.
The speech is routed to Emy or Terminal via the MikroBUS connector.
An external audio input allows the chip to use it as an external carrier for vocoder-like effects.

All the chips are thoroughly tested before shipping.

---

# VAX vox

Now you can add some texts, lyrics, poetry, or Kraftwerk’s style “sprechgesang” to your Eurorack set-up!

Vax vox is an add-on board that carries an Epson S1V30120 speech synthesis IC. The IC uses the Fonix DECtalk® v5 speech synthesis engine to talk in US English, Castilian Spanish, or Latin American Spanish in one of nine pre-defined voices.
