Robovox

Have your Emy or Terminal sing like the Kraftwerk singing typewriter.

This board is designed to host the Votrax SC02 on Kraftor, Emy or Emy Terminal, where the main firmware is running.
The speech is routed to Emy or Terminal via the MikroBUS connector.
An external audio input allows the chip to use it as an external carrier for vocoder-like effects.

All the chips are thoroughly tested before shipping.
