

# Sino Vox

It generates speech from Chinese Pinyin or plain English (with a charming accent).

Users can set the speed, pitch, and volume of one of the five different unique voices.

It is straightforward to operate, and the voices have great potentials.

 *Price does not include EU VAT*

---

# Robovox

**Have your Emy or Terminal sing like the Kraftwerk singing typewriter.**

This board is designed to host the Votrax SC02 on [Kraftor](#), [Emy](#) or [Emy Terminal](#), where the main firmware is running.

The speech is routed to Emy or Terminal via the MikroBUS connector.

An external audio input allows the chip to use it as an external carrier for vocoder-like effects.

All the chips are thoroughly tested before shipping. 

*Price does not include EU VAT*

---

# Terminal

Terminal is a standalone modular speech synthesizer containing [Emy](#) and a little PCB to provide power and extended connectivity.

It is powered via a USB connector.

**This is the very last Terminal / Order now and get a free [protective gig bag](#) and a [Polaxis patch](#)**

*Price does not include EU VAT*

---

# VAX VOX

Now you can add some texts, lyrics, poetry, or Kraftwerk's style "sprechgesang" to your Eurorack set-up!

Vax vox is an add-on board that carries an Epson S1V30120 speech synthesis IC. The IC uses the Fonix DECTalk® v5 speech synthesis engine to talk in US English, Castilian Spanish, or Latin American Spanish in one of nine pre-defined voices.

*Price does not include EU VAT*

---

# Kaiwa kit

It comes with a fully SMD assembled PCB and OLED display in place

Only the THT components need to be soldered

It comes with the [Kaiwa-vox](#) Japanese robot speech chip (of course!)

Includes a free SD card with Romaji example for instant fun!

Kaiwa-Vox module included

 *Price does not include EU VAT*

---

# Emy Assembled

Emy is a versatile speech synthesizer that can host a hardware synthesizer on its back via a mikroBUS port. This port allows transforming Emy in a matter of a minute. ([See add-on boards](#))

Emy comes flashed with a software that emulates the famous TMS5220/TMS5100 speech chips.

Includes a free USB gender changer (to connect a USB keyboard), an SD card reader, an SD card filled with LPC & Allophone files for instant fun!

 *Price does not include EU VAT*

---

## Mea vox

Mea Vox is a formant synthesizer add-on board with a French accent.

It is developed around the MEA8000 speech chip that was used in Apple II, Thomson T08, M05, and Amstrad CPC during the mid '80.

The MEA8000 is a formant speech synthesizer that can hold notes for nice singing effects.

The software allows text to speech from the SD card or a USB text keyboard.

A simple set of prosody markers help to tune the voice to produce realistic expressions.

 ***Price does not include EU VAT.***

---

# Kaiwa vox

Kaiwa Vox is a text-to-speech add-on board with a Japanese robotic voice.

It just needs to receive an ASCII string of Romaji Japanese to start speaking.

Designed for [Emy](#) or [Terminal](#) but can also be connected to a microcontroller (Arduino, STM32, ...)

The voice chip can be substituted with a [Slow female](#), [Male](#), or [Kawaii](#) cute female chip.

EU Price does not include EU VAT.
